

# Barcode Inference Pipeline Report

BAI

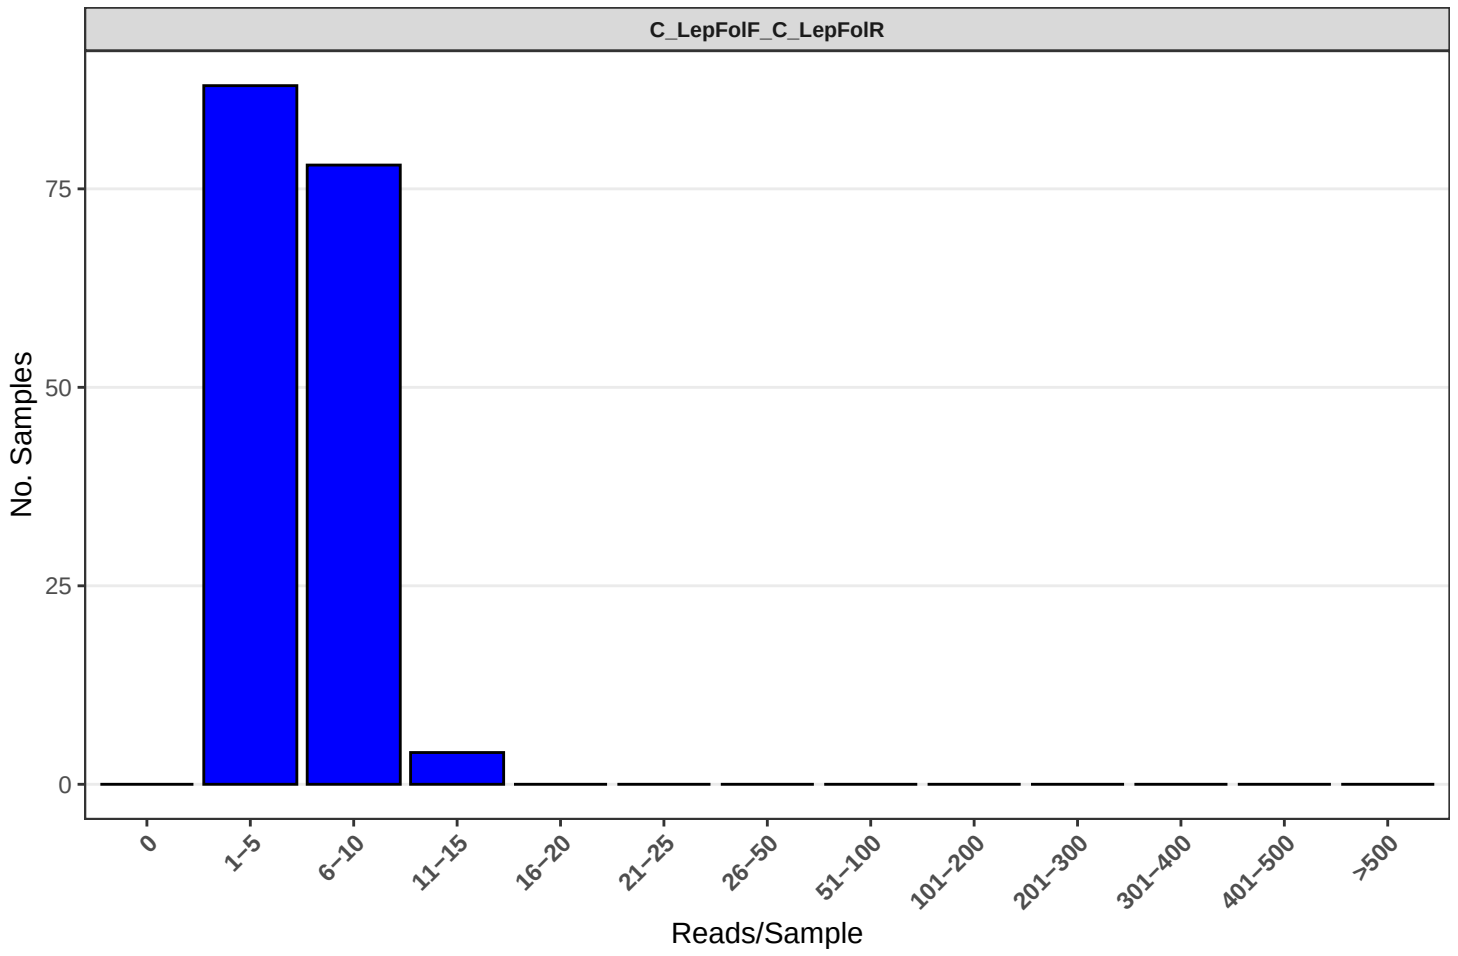

July 17, 2026

| Run Performance Summary                    |       |
|--------------------------------------------|-------|
| Total reads                                | 951   |
| Total samples with sequences               | 170   |
| Average reads per sample                   | 6     |
| Average OTUs per sample                    | 1     |
| Average reads per OTU                      | 5     |
| Negative Control Summary                   |       |
| Number of control OTUs                     | 0     |
| Average number of control OTUs per plate   | 0     |
| Number of control OTUs with > 10 reads     | 0     |
| Max reads per control OTU                  | 0     |
| OTU Summary                                |       |
| Total OTUs                                 | 174   |
| Non-target OTUs                            | 105   |
| Percent non-target OTUs                    | 60.3% |
| Barcode success rate (C_LepFoIF_C_LepFoIR) | 36%   |
